Cattle Feed Guide

HEIFERS:

Products Needed:

Lindner 377 Show Heifer

Lindner 375 Big Barrel

Most all heifer/ steers will eat 3% of their body weight

Ex: 600 lbs heifer/steer 18-20 lbs per day

Heifer Recommendation:

We recommend feeding 18-20 lbs of Lindner 377 and adding 2-4 lbs of Lindner 375 Big Barrel per day per head

Total feed ration:

16-20 lbs Lindner 377

2-4 lbs Lindner 375

STEERS:

Products Needed:

Lindner 373 Plus

Lindner 377

Lindner 372

Lindner 375 Big Barrel

Steer Recommendation:

We recommend starting steers out on 1/2 ration of 373 Plus and 1/2 ration of 377. By adding the 373 Plus you will keep the fat level high and keep the steer growing. The Lindner 377 will keep the steer fuller bodied while maintaining appetite. This feed is very palatable and cattle have had great consumption. The Lindner 375 Big Barrel will add depth of body and spring of rib.

When steers reach 1,000 lbs. switch to Lindner 373 plus. Utilize 372 the last 90-120 days to reach the ideal market condition.

Example 600 lb steer:

8-10 lbs Lindner 373 Plus

8-10 lbs Lindner 377

2-4 lbs Lindner 375 Big Barrel

When steers reach 1,000 lbs. we recommend feeding Lindner 373 plus with 2-4 lbs of Big Barrel.
